

Fredrick Maina Wanjohi

Ethical Hacker | Penetration Tester

• Nyeri, Kenya • +254796101276 • fredrickmaina351@gmail.com • LinkedIn: <https://www.linkedin.com/in/fredrick-wanjohi-0a51561a3>

Profile

I'm a Computer Science student specializing in Cybersecurity with hands-on experience in Ethical Hacking, Penetration Testing, and Security labs through TryHackMe, HackTheBox, and Cisco Networking Academy. Proficient in Python for scripting and automation and Git for version control.

Additionally, my roles in the National Census and Electoral process strengthened my ability to handle sensitive data with accuracy, integrity, and confidentiality.

I'm actively developing skills in vulnerability assessment, system security, and secure software design, with a strong focus on practical Cybersecurity problem-solving.

Education

Bachelor of Science in Computer Science

Expected Graduation:

DEDAN KIMATHI UNIVERSITY OF TECHNOLOGY, Nyeri, Kenya

April 2027

September 2023 – December 2026

- **Relevant Coursework:** Computer Networks, Operating Systems, Data Structures & Algorithms, Database Systems, Software Engineering, Cybersecurity fundamentals.
- **Honors & Awards:** Awarded the best student in First Year with a mean grade of A.
- **Clubs:** Chess Club

Professional Experience & Projects

Cybersecurity Learner/ Ethical Hacking/ Penetration Tester (Virtual Labs)

Continuous Learning

TryHackMe / Hack The Box / Cisco Networking Academy/ PicoCTF

Dec 2025 – Present

- Conducted penetration testing simulations on Linux and Windows environments using Nmap, Burp Suite, and Metasploit.
- Performed network reconnaissance, vulnerability scanning, and exploitation in controlled lab environments
- Practiced incident response workflows including log analysis and privilege escalation techniques
- Documented attack paths and remediation approaches based on security findings

Technical Support / IT Assistant (Industrial Attachment)

March 2026 – April 2026

The Judiciary, Nyeri Law Courts

2026

- Assisted in troubleshooting network and system issues supporting daily operations for multiple users.
- Supported setup and maintenance of workstations and peripherals reducing downtime during daily operations.
- Improved operational efficiency through technical support.

Cisco Ethical Hacking Training Participant

February 2026 – April 2026

- Completed Ethical Hacker course covering legal compliance, vulnerability assessment, and penetration testing workflows
- Gained understanding of scoping, executing, and reporting security assessments
- Developed awareness of real-world attack vectors and mitigation strategies

Distributed Library Management System(Dedan Kimathi Students project)

2024

Python, Pyro4 (Distributed Systems)

- Developed a distributed client-server system for managing books, members, and borrowing operations.
- Implemented RPC-based communication between services to enable distributed coordination.
- Used Git and GitHub for version control and collaborative development.
- Demonstrated understanding of distributed computing concepts and service interaction.

IEBC Polling Clerk / Census Enumerator

August 2022 / 2019

- Supported election operations with accuracy and integrity. Conducted accurate and confidential data collection.
- Conducted structured and confidential data collection during national census operations, ensuring integrity and accuracy of recorded information.
- Followed standardized protocols for handling sensitive citizen data, reinforcing principles of data privacy, confidentiality, and accountability.
- Maintained high levels of attention to detail while processing and validating large volumes of information under strict time constraints.
- Collaborated with teams in a regulated environment, ensuring smooth coordination and compliance with institutional procedures.

Technical Environment and Tools:

Windows, Linux (Kali), Virtual Labs (TryHackMe, HackTheBox)

Skills

Technical Skills:

- Cybersecurity Fundamentals (network security, vulnerabilities, threat basics) ★★★★★
- Penetration Testing Basics (reconnaissance, scanning, exploitation concepts) ★★★★★
- Python (scripting & automation for security tasks) ★★★☆☆
- Linux Expert (Kali Linux, command line usage) ★★★★★
- Networking Fundamentals (TCP/IP, DNS, HTTP/HTTPS basics) ★★★★★
- Tools: Nmap, Burp Suite, Metasploit, Wireshark (lab-based use) ★★★★★

- Git & GitHub (version control & collaboration) ★★★★★☆
- Web Fundamentals (HTML, basic web structure understanding) ★★★★★☆
- Data Handling & Analysis (structured data collection, integrity focus) ★★★★★★

Soft skills:

- Strategic Thinking & Risk Awareness. ★★★★★★
- Analytical Thinking (breaking down systems and identifying issues) ★★★★★☆
- Problem Solving (debugging, troubleshooting, logical reasoning) ★★★★★☆
- Attention to Detail (critical for logs, vulnerabilities, and data accuracy) ★★★★★☆
- Communication Skills (reporting findings clearly and concisely) ★★★★★☆
- Team Collaboration (group projects and structured environments) ★★★★★★
- Integrity & Confidentiality (handling sensitive data securely) ★★★★★★
- Time Management (working under deadlines, structured tasks) ★★★★★☆
- Adaptability (learning new tools and environments quickly) ★★★★★★

Certifications

- Getting Started with Cisco Packet Tracer – Cisco Networking Academy (June 02, 2026)
- CyberShujaa Certificate – Certified Ethical Hacker – Distinction (April 29, 2026)
- Cybersecurity & Emerging Technologies Awareness Training — ICT Authority / Cyber Shujaa (Apr 20, 2026).
- Cisco Ethical Hacker — Cisco / USIU-Africa (Apr 10, 2026).
- Pre-Security Learning Path — TryHackMe (Feb 21, 2026).
- Cybersecurity Certification — TechCrush.
- Building Strategic Foresight Capabilities — Coursera.
